

Last evaluation for compliance made January 13, 2010

Certificate of Compliance, European Council Directive 1907/2006 REACH (Registration Evaluation Authorization and restriction of Chemicals)

Viking Toys AB, Sweden hereby confirms that all products and packaging manufactured and used under its brand have been evaluated for compliance with EC Directive 1907/2006.

- All Viking Toys products and packaging are exclusively defined as articles as defined by REACH Article 3.3.
- Viking Toys articles do not contain any substance which is intended to be released during normal and/or reasonable foreseeable conditions of use. Substances in Viking Toys articles are thus exempted from registration under Article 7.1.
- Based on testing by accredited laboratories and suppliers' documentation, all Viking Toys articles have been determined not to contain any SVHCs (Substances of Very High Concern) as published in Annex XIV and/or on the candidate list. Consequently, notification of substances in articles under Article 7.2 is not required by Viking Toys or its EU-importers, regardless of imported annual tonnage of an individual substance.

Viking Toys will continue to assess and monitor substances in its articles in order to assure compliance with REACH. Should any of the substances contained within our articles and that can be found in a concentration higher than 0,1% w/w in the future be included in Annex XIV or on the candidate list, Viking Toys will in accordance with Article 33 forward information about these substances to its recipients with immediate effect.

This certificate will be updated periodically and can be obtained in its latest version from our website www.vikingtoys.se. For further information please contact Viking Toys.
